

PRODUCT INFORMATION

PRODUCT NAME VASOIL STERN TUBE OIL

DESCRIPTION VASOIL STERN TUBE OIL, is a high performance, high viscosity lubricant developed especially for the lubrication of stern tube bearings. It is formulated from high Viscosity Index base oils combined with emulsifiers and corrosion preventives additives.

VASOIL STERN TUBE OIL, emulsify with seawater and provide outstanding lubrication and rust corrosion protection. The oils' lubricating film resists seawater, keeping stern tube systems protected for extended periods of time and under severe operating conditions.

PRODUCT USE

VASOIL STERN TUBE OIL, is recommended for the lubrication of Cedervall-type stern tube bearings on ships where a high viscosity, readily-emulsifying lubricant is recommended .

SPECIFICATIONS

Rust Test-Seawater, ASTM D 1401
