

PRODUCT INFORMATION

PRODUCT NAME VASOIL ANTIFREEZE VG 11 SOLUTION

DESCRIPTION VASOIL ANTIFREEZE VG11 SOLUTION is an Engine Coolant solution (antifreeze) based on mono ethylene glycol with carefully chosen additive package which is free of nitrite, amine, phosphate, diluted in deionized water. It is suitable for both petrol and diesel engines.

PRODUCT USE

VASOIL ANTIFREEZE VG 11 SOLUTION , protects cooling systems of automotive and industrial gasoline and diesel engines and give the following properties:

1. Thermal characteristics that permit effective engine cooling without boiling.
2. Anticorrosion protection of all metals and alloys used in the cooling system of modern vehicles.
3. Protection against frost, depending on the concentration chosen.
4. Compatibility with rubber and plastics used in the cooling system.
5. Excellent antifoaming characteristics.
6. Protection against frost, depending on the concentration chosen.
7. Meets all European and most International Standards.

The freezing point of the antifreeze solutions is -18°C

SPECIFICATIONS

VASOIL ANTIFREEZE VG11+ SOLUTION

complies with the following quality standards :

• ASTM D3306 (USA)	• AFNOR NF R15-601 (France)	• CUNA NC 956-16 (Italy)
• ASTM D4656 (USA)	• FFV Heft R443 tests (Germany)	• UNE 26-361 (Spain)
• SAE J 1034 (USA)	• AS 2108 (Australia)	• BS 6580 (UK)
• JIS K 2234 (Japan)	• ONORM V 5123 (Austria)
